Stress-Free Homeownership: We Handle Every Fix, Big or Small!

We all know that homeownership can be both rewarding as well as stressful at times. Keeping track of all of the things in a home that need either constant or periodical upkeep is daunting, especially when doing it on your own.

Whether you're a first time homeowner, have moved multiple times, or have made your current home a well-loved space for many years, everyone needs help when it comes to upkeep. Our team of experts are here to not only help you with your window replacements and new decks, but also to help educate and give you the confidence to care for your home in the way that you deserve.

Contact our team of E&M Experts today by calling 508-359-7904 or visiting our [website](#)

"They came to our home and did an assessment and determined several locations where water was coming into the home. Their team put a plan in place and completely resolved the issue which required roof flashing, addressing the gap between the chimney and the home, replacing siding and painting and repairing the interior walls and the siding on the home. I strongly recommend Mitchell Construction to anyone doing home renovation and/or who have home maintenance needs." – Dave Orrechio

Project Highlight

A Black & Gold Beauty

Before

**2024 National Chrysalis
Award Winner**

The existing kitchen already had plenty of great , island to an expansive one-height counter that but it had become outdated and no longer allows the kitchen to feel more open. The matched the homes style and aesthetic. These countertops were replaced with Taj Mahal homeowners wished to make the heart of their Quartzite for a clean and elegant feel. Not a fan home something that they could be proud of while of the white kitchen, the cabinetry was replaced being true to themselves. Some features in the new with custom lightly stained rift-cut white oak design included changing the existing two-level and custom black cabinetry standout features.

Award Winner!

The existing fireplace once matched the exterior of the home, but now that it had remodeled, it no longer fit. A stunning custom wooden frame was built around the existing fieldstone and painted white to brighten a once dark area. The brick of the fireplace was white-washed to tie it in with the nearby mudroom, and the panel system on the frame was designed to match beautifully with the columns in the connected kitchen space. The new fireplace beautifully brings together the entire room and creates a stunning focal point.

Celebrating Another Year of Relationships

We recently held our annual Client Appreciation Night at the Fireside Tavern in Sherborn. A night of drinks, food, and laughter was enjoyed between the Mitchell team and the homeowners that we have worked with over the last year.

We're grateful that such wonderful people continue to let us help create their dream homes with them, and were able to come enjoy an evening of celebration!

Thank you to all that attended as well as the Fireside Tavern for another successful event!
